## NO REASON TO THROW AWAY A WORN TOOL

Brancs Reconditioning Program offers more than just basic re-grinding of tools. This service provides “as new” performance at a recondition price. cutters are re-manufactured using the original equipment, programs and coating, by the same experienced staff that provided the original tool.

### **Your Benefits from Reconditioning**

- Guaranteed high, consistent performance, just like a new tool
- Original geometry, edge preparation and coating
- Significant savings on tooling costs by repeated use of the solid carbide tool
- Safe transportation and storage of the tool
- Secure identification with a new packing label
- An easy process
- Guaranteed quality,

Paid twice, and used four times. Because the price for regrinding and recoating a tool is around 1/3 of the Price of a new tool and a tool can be reconditioned three times on average, you'll see how  $1+1=4$ .  
By purchasing a new tool and having it reconditioned three times, you substantially lower production cost  
And reduce the burden on your valuable internal resources.
